

Dealer Support Services

Supporting Manufacturer Approved Used Programs

As part of our Automotive Technology Solutions business we offer a range of services to support the implementation and ongoing marketing of Manufacturer Approved Used & Certified Programs.

With over 15 years experience and being the approved partner for over 20 leading manufacturers, we can assist in the planning, development, implementation and ongoing support of such programs.

Benefits of these services are as follows:

- Maximise exposure of used stock nationally
- Increase network used vehicle sales
- Increase market share
- Increase stock turn
- Increase resale values
- Improve visibility
- Provide a first class customer experience
- Provide a consistent presentation of the brand

Some of the products we offer include cutting edge vehicle locator systems, professional branded point of sale materials, data management, vehicle photography training, and inter-dealer wholesale trading platforms.

These systems and services enable dealers and manufacturers to achieve the maximum re-sale values for their vehicles: selling more cars, more often, for higher value.

To find out more about what we can offer to support your used vehicle program please contact Glen Faulkner on (03) 9922 6447 or by e-mail on glen.faulkner@manheimfowles.com.au.
