## Vehicle Inspection System

Our vehicle inspection systems software saves your business time, increases efficiency and most importantly saves you money.

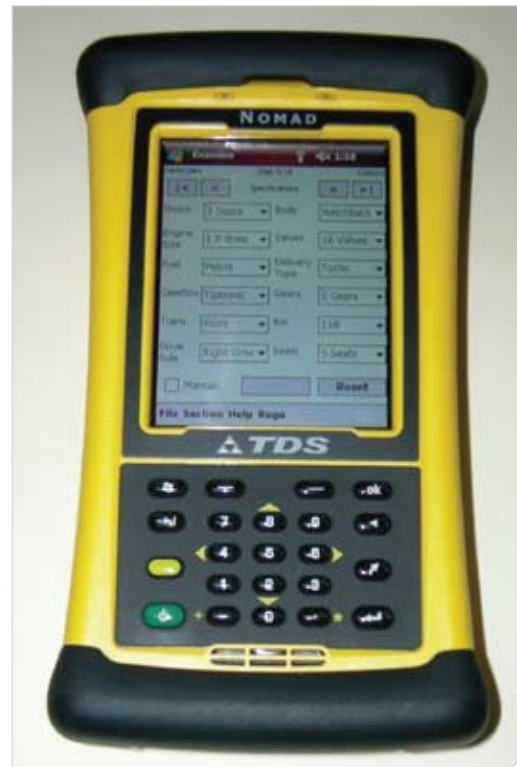

This unique software has been developed to support large fleet operators in the management and defleeting of vehicles. The system can be fully integrated into your business systems and replaces existing manual processes.

We currently provide this software to some of the industry's most respected fleet operators who have all reported significant cost savings and improvements in their fleet management process alongside providing a more professional service to customers.

The points below provides a summary of the key features and benefits of this system. However, to find out more and how it could impact your business please contact the Automotive Technology Solutions team at ManheimFowles.
