VIMS

VIMS, the Vehicle Information Management System, is designed as your window into ManheimFowles, providing you with information about your vehicles to help you get the best remarketing results. As VIMS is part of the ManheimFowles website, you and your staff can access it when and where it's convenient to you.

VIMS provides a comprehensive set of reports matched to your business needs. These reports cover the entire remarketing process; from transport, through stock lists, pre and post sale reporting to remittance reporting. From the reports you can drill down to see photos, inspections, condition reports and road test results. The reports are interactive, giving you full control over when to release vehicles for sale and what reserve prices to set.

VIMS Benefits

- Manage your stock any time from wherever you are; in the office, at home or on the road using wireless Internet
- Comprehensive reports and drill-downs cover all facets from transport and logistics through to inspections, road tests, photography, evaluations, auctions, remittances and analysis
- Powerful user interface provides deep and rich information in an easy to use format
- Export reports to PDF for distribution or to Excel for further analysis
- Reports can all be customised in terms of vehicles shown, columns, sorting and totalling to match your individual management and reporting needs
- Efficient two-way communication of transport, stock identifiers, rectification orders, pricing and more saves you time and money on communication

- Direct connections between VIMS and our SAP Enterprise Resource Planning system eliminate delays and waste from miscommunication of information
- Inbuilt cost recovery tools help you bill unfair wear and tear back to the originator
- ValueFinder links provide current market pricing on each vehicle
- Flexible security allows you to restrict confidential information such as pricing from some of your staff, and key changes have a visible audit trail
- Fully secured website protects the confidentiality of your information
